

GPR

UTILITY LOCATING

Utility Locating Using

Ground Penetrating Radar Technology

By scanning the subsurface with radar pulses, we can help locate and identify targets that are otherwise difficult to find using conventional electro-magnetic equipment:

- Non-Conductive Sewer Pipes (Plastic, Clay, Concrete, Asbestos)
- Old, Corroded Pipes
- Abandoned Lines
- Manholes
- Missing Valves
- Buried Tanks
- and More

505 US Highway 9
Lanoka Harbor, NJ 08734
